The global Lithium Battery Power Tools market size is expected to reach \$ 21400 million by 2029, rising at a market growth of 7.7% CAGR during the forecast period (2023-2029).

The key manufacturers of Lithium Battery Power Tools in the world are TTI, Stanley Black & Decker, Bosch, Makita, HiKOKI, Hilti, Snap-on Incorporated and Dongcheng, among which the market share of the top three manufacturers exceeds 40%, and the largest manufacturer is TTI. The global production of lithium battery power tools is mainly distributed in North America, Europe, China and Japan, among which the top three regions account for more than 80% of the market share, and China is the largest production region at present. In terms of its products, the growth rate of screwdriver is relatively fast. At present, the market share of drill is the highest, more than 30%, followed by saw, wrenches, screwdrivers, hammers and angle grinder. As far as its application is concerned, commercial is the largest application field, with a market share of nearly 70%, followed by the household field.

The batteries of Power Tools mainly include nickel-cadmium, nickel-hydrogen batteries and lithium-ion batteries, among which lithium-ion batteries occupy an absolute dominant position, and the penetration rate continues to increase. Due to the high rate discharge and high energy density requirements of power tools, they are basically monopolized by the ternary battery system at present.
