According to our (Global Info Research) latest study, the global Lithium Battery Vacuum Baking Machine market size was valued at US$ million in 2025 and is forecast to a readjusted size of US$ million by 2032 with a CAGR of %during review period.

Lithium battery vacuum baking machine is a kind of equipment specially used in lithium battery production process, mainly used to remove moisture and solvent from electrode materials, separators or whole battery components. During the manufacturing process of lithium batteries, the presence of moisture can lead to degradation of battery performance, such as increased internal resistance, reduced capacity, and shortened cycle life. Therefore, before assembling the battery, it is necessary to use a vacuum baking machine to dry the battery assembly under high temperature and vacuum environment.
