## Abstracts

According to our (Global Info Research) latest study, the global Lithium Bromide Solution market size was valued at US\$ 746 million in 2025 and is forecast to a readjusted size of US\$ 1115 million by 2032 with a CAGR of 6.1% during review period.

Lithium Bromide Solution (LiBr Solution) is a clear, hygroscopic aqueous solution of lithium bromide. It is highly soluble in water and has strong moisture-absorbing properties. Commonly used in absorption refrigeration systems, it acts as the absorbent to absorb water vapor in the cycle. It is also used in chemical synthesis, pharmaceuticals, and some specialized industrial processes. In 2025, global Lithium Bromide Solution production reached approximately 145,000 tons, with an average global market price of around US\$ 5,000 per ton. Annual production capacity is 180,000 tons. Gross Profit Margin: 15.98%. The Lithium Bromide Solution industry chain begins with upstream raw materials, primarily lithium compounds and bromine, which are produced from lithium mines, brine extraction, and bromine recovery facilities. In the midstream, manufacturers synthesize lithium bromide and formulate it into solutions of various concentrations for industrial use. Downstream applications include absorption refrigeration systems, dehumidification equipment, and chemical synthesis industries. Each segment of the chain is interdependent, with raw material supply and downstream demand directly influencing global production and pricing. Lithium Bromide Solution represents a niche but steadily growing chemical market, driven by industrial air-conditioning, HVAC, and chemical applications. While the overall market size is smaller than other lithium derivatives like LiOH or Li<sub>2</sub>CO<sub>3</sub>, its stability and critical role in absorption chillers make it a strategic specialty chemical. Companies investing in high-purity production and solution optimization may gain a competitive edge, especially as energy-efficient refrigeration and industrial drying technologies expand globally.
