Abstracts

According to our (Global Info Research) latest study, the global Lithium Iodide market size was valued at USD 5 million in 2023 and is forecast to a readjusted size of USD 7 million by 2030 with a CAGR of 4.7% during review period.

Lithium Iodide is generally immediately available in most volumes. High purity, submicron and nanopowder forms may be considered. Hydrate or anhydrous forms may be purchased. Iodide compounds are water soluble; however, iodide-rich solutions act as better dissolution agents for creating iodide solutions. Iodides are often used in internal medicine. Treating an iodide with manganese dioxide and sulfuric acid sublimes the iodine. American Elements produces to many standard grades when applicable, including Mil Spec (military grade); ACS, Reagent and Technical Grade; Food, Agricultural and Pharmaceutical Grade; Optical Grade, USP and EP/BP (European Pharmacopoeia/British Pharmacopoeia) and follows applicable ASTM testing standards. Typical and custom packaging is available. Additional technical, research and safety (MSDS) information is available as is a Reference Calculator for converting relevant units of measurement.

Global Lithium Iodide key players include Albemarle, American Elements, Leverton Lithium, Shanghai China Lithium, Triveni Chemicals, etc. Global top five players hold a share about 50%.

North America is the largest market, with a share about 30%, followed by China and Europe, having a total share about 50 percent.
