## Abstracts

The global Lithopone market size is expected to reach \$ 215 million by 2032, rising at a market growth of 2.7% CAGR during the forecast period (2026-2032).

Lithopone is a mixture of inorganic compounds, widely used as a white pigment powder. It is composed of a mixture of barium sulfate and zinc sulfide. These insoluble compounds blend well with organic compounds and confer opacity. Related white pigments include titanium dioxide, zinc oxide ('zinc white'), and zinc sulfide.

Market competition is concentrated. Xiangtan Red Swallow, Paris Horses, Shanghai Yuejiang, etc. are the main players of the industry, totally with above 31% market share.

China is the largest supplier of lithopone, with a production market share nearly 91%. Due to pollution problems, developed countries are no longer produced lithopone.

China is the largest consumption place, with a consumption market share nearly 33%. Following China, Europe is the second largest consumption place with the consumption market share of 20%.

The classification of lithopone includes B301, B311 and others, and the proportion of B301 is about 57%. Lithopone is widely used in paint & coating, plastic and other field. The most proportion of lithopone is paint & coating, and the consumption proportion is about 75%.

This report studies the global Lithopone production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Lithopone and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
