Live bottom trailers are specialized trailers that have a conveyor belt system installed on the bottom of the trailer. These trailers are mainly used for hauling loose materials like gravel, sand, asphalt, and farm products like grains, silage, and feed.

The conveyor belt system in these trailers is powered by hydraulics and can be started and stopped as per the demands of the operator. This allows for a constant flow of material without having to stop the truck or trailer for unloading.

Live bottom trailers are highly useful for transporting large quantities of bulk materials over long distances, and they are commonly used in the construction and agriculture industries.

Its design provides a safe alternative to rollover machines, virtually eliminating the possibility of rollover.

Live bottom trailers are available in different axle configurations, including 3-axle, 2-axle, and 4-axle. The choice of axle configuration will depend on the hauling needs and regulations in a given location.
