According to our (Global Info Research) latest study, the global LNG Carrier Charter Service market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

The LNG carrier leasing service refers to the way in which the LNG ship owner and the charterer negotiate and lease the ship to the charterer by bareboat or on a fixed-term or voyage charter, and arrange the transportation of goods according to the provisions of the charter contract.

Global liquefaction export capacity increases to 462 million tons/year: By the end of 2022, the global LNG export liquefaction capacity will be 462 million tons, and the annual new capacity will be 19.4 million tons, with a year-on-year growth rate of 4.4%. 1.5 million tons in Russia and 5 million tons in Calcasieu Pass T10-18 in the United States are still in the trial operation stage.

After Moscow invaded Ukraine in 2022, Europe lost most of its Russian pipeline gas supply, leading to record global LNG demand and European importers scrambling to get more ultra-refrigerated gas to meet customer demand. LNG vessel leasing has become one of the main ways to obtain liquefied natural gas in Europe, which will usher in the rapid growth of the LNG vessel leasing service market.
