LNG dump trucks are dump-type transport vehicles that use liquefied natural gas as fuel and are designed for efficient and environmentally friendly heavy-load transportation. This type of vehicle uses an LNG engine to replace traditional diesel engines, which has significant environmental advantages, including significantly reducing emissions of carbon dioxide, nitrogen oxides and particulate matter, and is an ideal solution to meet increasingly stringent environmental regulations. LNG dump trucks are usually equipped with cryogenic tanks to store fuel, have long cruising range, and have power performance comparable to or even better than diesel vehicles.
