Abstracts

According to our (Global Info Research) latest study, the global Long-Path Gas Cell market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

Long-path gas cell is a gas cell whose light path is over 10 m. Long-path gas cell is used to measure ppm-order or lower concentration gas samples. These gas cells do not offer a 10 m light path in a straight line. Rather, they comprise three mirrors, and the long light path is achieved by repeated reflections within the gas cell.
