Abstracts

The global Long Pips Table Tennis Rubber market size is expected to reach \$ 63.12 million by 2032, rising at a market growth of 3.1% CAGR during the forecast period (2026-2032).

Long Pips Table Tennis Rubber is a type of table tennis racket rubber featuring outward-facing pimples with extended pimple height, designed to alter friction characteristics and spin transfer between the ball and rubber surface. Long pips rubber provides unique performance characteristics including spin reversal, passive control, reduced sensitivity to incoming spin, and irregular ball trajectories, making it particularly suitable for defensive, chopping, and variation-based playing styles. Compared with pimped rubber and short pips rubber, long pips rubber uses longer and softer pimple structures to create more significant spin variation and rhythm disruption, although it requires higher technical skills and control ability from players. Compared with inverted rubber, long pips rubber has weaker active spin generation capability but provides significant advantages in defensive play, placement variation, and handling heavy incoming spin. These products are mainly used in professional table tennis, competitive training, amateur tournaments, sports clubs, and specialized playing equipment markets. Professional-grade long pips rubber requires higher standards for pimple length, hardness, elasticity, consistency, and durability. In 2025, the global long pips table tennis rubber is estimated at approximately annual shipments of around 2.1 million units and a price of approximately USD20.00 per unit. The market is expected to grow at a CAGR of approximately 3.2% over the next five years. Typical single-line production capacity ranges from 0.3 million to 1.5 million units per year, while high-end professional and competition-grade products generally operate at lower capacities due to stricter requirements for formulation development, pimple structure control, and quality inspection. Industry gross margins typically range from 40% to 50%.
