Abstracts

Long-term care is a service which helps meet medical and non medical needs of people with chronic illnesses or disabilities. It involves a variety of services designed to meet a person's health or personal care needs during a short or long period of time. These services assist people to live independently and safely when they can no longer perform everyday activities on their own.

Scope of the Report:

This report studies the Long-term Care Software market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Long-term Care Software market by product type and applications/end industries.
Completely integrated EHR (or electronic health record) BI as well as billing solution that helps facilities to improve their resident care, manage different levels and maintain compliance with single software solution. The software is used for CCRCs, nursing homes etc. Popular features of long -term care software includes centralized database, user friendly graphic user interface (or GUI). The software can not only handle errors or failures effectively but also acts as online sensitive assistance and information base for end users.
Several factors including but not limiting to demographic trends, limited healthcare specialists and different initiatives taken by government bodies worldwide to reduce the medical cost have contributed to the growth of the market. However, opposition by LTC providers to embrace software and high cost involved in the maintenance are obstructing the development of the market. On the other hand, North American region is likely to create greater opportunities.
