Long-shelf glass fiber prepreg refers to a semi-finished material made by impregnating glass fiber reinforcement materials (such as alkali-free glass fiber cloth, yarn, etc.) in a resin matrix through a specific process. Its core feature is that after the resin matrix is modified or packaged and optimized, it can be stored stably for a long time at room temperature (usually for several months or even more than a year), while maintaining the uniform impregnation state of the fiber and the resin and subsequent processing performance.
