Abstracts

According to our (Global Info Research) latest study, the global Long-Wear Eyeshadow Stick market size was valued at USD 19370 million in 2023 and is forecast to a readjusted size of USD 27740 million by 2030 with a CAGR of 5.3% during review period.

The long-wear eyeshadow stick can help with convenient eyeshadow application and achieve fast eyeshadow application effect.

The increasing popularity of natural and organic cosmetics has prompted major manufacturers to strengthen their research operations. This is because cosmetic brands often add harmful chemicals such as parabens, phthalates, fragrances, lead, talc, etc. to their beauty products to reduce manufacturing costs. These ingredients can cause harm to the skin in the long run. Owing to rising skin awareness and increasing disposable income of the middle class, there is a growing preference for premium beauty products. In addition, consumers who are makeup enthusiasts may want an eyeshadow product that does not require a lot of time to apply. Hence, the rising demand for eyeshadow sticks and the growing popularity of beauty bloggers and social media are spreading awareness about the uses and benefits of eyeshadow sticks, which is expected to popularize these products. Additionally, eyeshadow sticks are available in the market in two different finishes, matte and shimmer, providing different eyeshadow looks. These are the major drivers expected to drive market growth during the forecast period.
