Loquat Powder is a fruit-derived, water-dispersible powder made from the edible fruit of loquat. It is used as a natural fruit ingredient to provide loquat's characteristic sweet, slightly tart fruit profile, as well as naturally occurring fruit solids.

Upstream, the key raw material is ripe loquat fruit, and industrial products may be made from different fruit fractions such as whole fruit, fruit pulp, or fruit juice/concentrate. Downstream, loquat powder is supplied to manufacturers of functional beverages and drink mixes, bakery/confectionery, dairy & desserts, and dietary supplements; loquat fruit is also widely used in processed fruit foods such as jams/jellies, which supports its flavor positioning in formulated products.

In 2025, global sales of Loquat Powder reached approximately 738 tons, with an average global market price of around US\$ 16/kg. The gross profit margin is approximately 20%-40%.
