Low Calorie Cooking Spray is a type of cooking oil spray that is designed to have a significantly lower calorie content compared to traditional cooking oils or fats. These sprays are typically made with a light oil base, such as canola, olive, or vegetable oil, which has been emulsified with a propellant gas to allow for a fine mist spray. The use of a spray bottle ensures that only a minimal amount of oil is applied to the food, making it an excellent choice for those looking to reduce their overall calorie intake while still enjoying the flavor and texture that oil can provide in cooking.
