Low foaming cleaner for plating is designed to minimize foam formation, catering to the needs of foam-sensitive plating processes. It gently and effectively removes oils, dust, and other contaminants from the surface of the workpiece without causing erosion or damage to the material. This ensures uniform deposition and good adhesion of the plating layer. Additionally, the cleaner's low-foaming characteristic prevents solution contamination and instability during the plating process, thereby enhancing plating quality and production efficiency, and guaranteeing that the final product meets high-quality standards.
