## Abstracts

The low-frequency pulse shoulder and neck massager is a massager that combines low-frequency pulse electrical stimulation with massage techniques to relieve shoulder and neck fatigue and relieve muscle soreness. It usually includes a massage head and a control panel that can adjust the massage intensity and mode. By emitting low-frequency pulse current, it stimulates muscle contraction, promotes blood circulation, reduces muscle fatigue and tension, and relieves shoulder and neck discomfort. Low-frequency pulse shoulder and neck massagers generally have a variety of massage modes and intensities to choose from, such as kneading, massaging, tapping, etc., and users can adjust them according to their own needs and comfort level. In addition, some massagers are equipped with heating functions, which can improve the massage effect and make the user feel more comfortable.
