Global Low-Migration Printing Inks for Food Packaging Market 2026 by Manufacturers, Regions, Type and Application, Forecast to 2032

https://marketpublishers.com/r/GA9A9F799D4DEN.html
Date: September 2026
Pages: 200
Price: US$ 3,480.00 (Single User License)
ID: GA9A9F799D4DEN

Abstracts

According to our (Global Info Research) latest study, the global Low-Migration Printing Inks for Food Packaging market size was valued at US$ 334 million in 2025 and is forecast to a readjusted size of US$ 532 million by 2032 with a CAGR of 6.8% during review period.

Low-Migration Printing Inks for Food Packaging are finished printing ink formulations engineered to minimize the transfer of ink constituents into food through substrate penetration, set-off, gas-phase transfer and other foreseeable migration pathways. Product design combines controlled raw-material selection, migration-optimized binders and colorants, Good Manufacturing Practice, contamination control and validated printing, drying or curing conditions. The market primarily covers water-based, solvent-based, oil-based and reactive-liquid ink systems used on food packaging substrates such as plastic films, paper, paperboard, labels, sleeves, aluminum foil and metal containers. Core applications include flexible films and pouches, paper bags and wrappers, cartons and corrugated boxes, labels and sleeves, metal cans and closures, and specialized food packaging. Product suitability is assessed within the complete printed-package structure because migration performance depends on ink formulation, substrate barrier properties, ink coverage, printing conditions, curing efficiency, storage time, temperature and the characteristics of the packaged food.

Key Findings

Global sales volume reached approximately 40.0 thousand tons in 2025

+357 96 030922
info@marketpublishers.com

Global sales volume is estimated at approximately 42.0 thousand tons in 2026

The global average selling price was approximately US$8.13 per kilogram in 2025

Water-based inks represent the largest primary vehicle segment by sales volume

Flexible films and pouches account for more than half of total low-migration ink demand

Market Trends

The Low-Migration Printing Inks for Food Packaging market is shifting from product-level safety claims toward system-level compliance covering raw-material characterization, manufacturing hygiene, substance disclosure, migration assessment and converter process control. The latest industry practices place greater emphasis on Statements of Composition, non-intentionally added substance risk assessment, contamination prevention and documented suitability for specific substrates and food-contact conditions. Product development is moving toward water-based formulations, recyclable flexible-packaging structures, nitrocellulose-free systems, low-migration UV and LED-UV inks, digital packaging inks and products capable of withstanding demanding thermal conditions. Sustainability requirements are increasingly being integrated with food-contact compliance, encouraging lower solvent use, bio-renewable content and inks designed to support mechanical recycling. At the same time, suppliers are expanding beyond ink formulation to provide regulatory documentation, press-side guidance, color-management support and package-level validation services, making technical service and compliance capability increasingly important sources of differentiation.

Market Dynamics

Drivers

Demand is supported by stricter food-contact-material requirements, brand-owner substance restrictions and greater scrutiny of migration from printed packaging.

+357 96 030922
info@marketpublishers.com

Regulatory frameworks and industry guidance increasingly require controlled raw-material selection, Good Manufacturing Practice and communication of potentially migratable substances throughout the packaging supply chain. Continued growth in flexible food packaging, labels, cartons and convenience-food formats expands the underlying printed surface requiring compliant inks. Conversion from conventional packaging inks to qualified low-migration systems provides an additional source of demand beyond the growth of packaging volume itself, particularly among multinational food producers and export-oriented packaging converters.

Restraints

Low-migration inks carry higher formulation, testing and compliance costs than standard packaging inks because suppliers must control raw-material impurities, maintain segregated manufacturing practices and provide detailed regulatory information. Qualification can require migration testing of the final printed structure under defined food simulants, temperatures and contact periods, extending customer approval cycles. Some low-migration systems also require tighter control of ink film weight, drying, curing energy, press speed and set-off prevention. Smaller packaging converters may delay adoption where local enforcement is limited or where compliant ink systems require new curing equipment, coatings, functional barriers or changes in press operating conditions.

Opportunities

The strongest opportunities lie in replacing conventional inks in food flexible packaging, labels, folding cartons and export-oriented packaging production in Asia. Water-based systems can gain penetration in paper packaging, corrugated boxes and selected films, while reactive-liquid products provide higher-value opportunities in narrow-web labels, sleeves and premium cartons. Digital packaging platforms offer additional growth through short production runs, variable data, lower inventory and rapid design changes. Specialized applications such as ovenable packaging, baking paperware, food-service packaging and validated direct-food-contact printing remain relatively small but command higher technical value. Suppliers that combine compliant formulations with recycling compatibility, bio-renewable content and technical validation are positioned to capture premium projects from global brand owners.

Challenges

+357 96 030922
info@marketpublishers.com

Compliance is determined by the finished printed packaging rather than by ink formulation alone. Differences in substrates, barrier performance, ink coverage, drying efficiency, curing dose, reel storage, set-off conditions and food characteristics can produce different migration outcomes from the same ink. Global regulation remains fragmented, requiring suppliers to manage differing positive lists, migration limits, customer standards and documentation expectations across markets. Trace impurities and non-intentionally added substances create additional analytical complexity, while reactive UV systems require particularly careful control of residual monomers and photoinitiators. The market must therefore balance printing performance, color strength, adhesion, heat resistance, recyclability and migration safety without making unqualified food-contact claims.

Industry Chain Analysis

The upstream industry supplies pigments, resins, binders, solvents, vegetable-oil derivatives, monomers, oligomers, photoinitiators, waxes and functional additives. For low-migration applications, value depends not only on material performance but also on impurity profiles, toxicological assessment, migration limits, traceability and the supplier’s ability to disclose regulatory-relevant substances. Raw-material selection is therefore narrower and more controlled than in general-purpose packaging inks, creating higher qualification costs and greater dependence on technically capable specialty-chemical suppliers.

The midstream consists of ink formulation, scale-up, controlled manufacturing, quality assurance, color matching and preparation of compliance documentation. Ink manufacturers create value through formulation expertise, global raw-material databases, dedicated production controls, migration-risk assessment and technical support for converters. Downstream participants include flexible-packaging printers, label converters, carton manufacturers, metal decorators, food-packaging companies and brand owners. Final package compliance is established through the combined performance of the ink, substrate, coating, adhesive, printing process and intended food-contact conditions. Higher-margin opportunities are generally concentrated in reactive-liquid inks, digital systems, direct-contact products and specialized thermal applications, while water-based and solvent-based inks generate larger shipment volumes but face stronger price competition.

Segment Insights

+357 96 030922
info@marketpublishers.com

By primary ink vehicle, water-based inks form the largest individual segment by volume, supported by paper bags, cartons, corrugated food boxes, labels and selected flexible-packaging applications. Solvent-based inks remain important in gravure and flexographic printing of plastic films and laminated food packaging, particularly where high print speed, adhesion and resistance performance are required. Together, water-based and solvent-based inks represent close to three-fifths of estimated shipment volume. Oil-based inks maintain a stable position in sheetfed carton printing, while reactive-liquid inks represent approximately one-fifth of volume but a higher proportion of market value because of their higher average selling prices and more demanding formulation requirements.

Flexible films and pouches account for more than half of estimated demand, making them the largest application category. Labels and sleeves represent approximately one-fifth, supported by beverage, dairy, prepared-food and container-decoration applications. Cartons and corrugated boxes contribute a low-teens share, while metal cans and closures form a smaller but technically demanding segment. Other food packaging includes baking paperware, sausage casings and specialized direct-contact structures, where volumes are limited but qualification barriers and unit values are higher.

Downstream Market Opportunities

Flexible food packaging remains the principal downstream opportunity because brand owners are simultaneously pursuing food safety, shelf-life performance, lightweight packaging and recyclable structures. Labels and sleeves offer attractive growth through premium graphics, digital short runs and increasing compliance requirements for beverage, dairy and prepared-food packaging. Paper bags, folding cartons and corrugated boxes benefit from substitution of plastic formats and the expansion of takeaway and food-service packaging, although barrier coatings and moisture resistance must be coordinated with the ink system. Metal cans and closures provide stable demand where inks must withstand forming, sterilization and filling processes. Specialized thermal and direct-contact applications create additional premium niches for suppliers capable of providing formulation data and package-level validation.

Regional Insights

Europe remains the regulatory and premium-value center of the Low-Migration Printing

+357 96 030922
info@marketpublishers.com

Inks for Food Packaging market. The region has an established food-contact ink ecosystem, a dense base of specialized manufacturers and extensive use of industry Good Manufacturing Practice, composition disclosure and migration assessment. Regulatory developments in Germany and Switzerland continue to influence formulation practices beyond Europe because multinational food companies and converters frequently apply European requirements across international supply chains.

Asia-Pacific is the main volume-expansion region, supported by large food-packaging production bases in China, Japan, India, South Korea and Southeast Asia. Japan has strong formulation technology and global ink groups, while China combines growing domestic compliance requirements with a broad base of regional water-based, offset and UV ink manufacturers. India and Southeast Asia offer medium-term conversion opportunities as export packaging and multinational food production expand. North America is differentiated by advanced label, flexible-packaging and digital-printing applications, together with strong demand from major food and beverage brand owners.

Competitive Landscape Analysis

The verified core competitive base comprises 38 independent economic groups or entities carrying full product responsibility. Competition is structured around several distinct supplier models. Global integrated groups such as DIC through Sun Chemical, Siegwerk, Flint Group, artience through Toyo Ink, SAKATA INX through INX International and hubergroup compete through broad technology portfolios, multinational production networks, regulatory databases and on-site technical service. European specialists such as Epple, Zeller and Gmelin, Doneck, Pulse, Resino, Colorgraf and ROTOFLEX focus on specific printing processes, direct-contact systems, narrow-web labels or high-compliance regional customers. Digital-platform suppliers including HP, Epson, Agfa and Fujifilm compete through closed ink-and-equipment ecosystems, validated process conditions and variable-data capabilities. Chinese manufacturers are strengthening their position through water-based formulations, local cost advantages and faster customer response, although the depth of public migration documentation remains uneven. Competitive advantage increasingly depends on the ability to combine product safety, print performance, regulatory documentation, recycling compatibility and consistent manufacturing across regions rather than on ink price alone.

Report Scope

+357 96 030922
info@marketpublishers.com

This report is a detailed and comprehensive analysis for global Low-Migration Printing Inks for Food Packaging market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Low-Migration Printing Inks for Food Packaging market size and forecasts, in consumption value ($ Million), sales quantity (Tons), and average selling prices (US$/kg), 2021-2032

Global Low-Migration Printing Inks for Food Packaging market size and forecasts by region and country, in consumption value ($ Million), sales quantity (Tons), and average selling prices (US$/kg), 2021-2032

Global Low-Migration Printing Inks for Food Packaging market size and forecasts, by Type and by Application, in consumption value ($ Million), sales quantity (Tons), and average selling prices (US$/kg), 2021-2032

Global Low-Migration Printing Inks for Food Packaging market shares of main players, shipments in revenue ($ Million), sales quantity (Tons), and ASP (US$/kg), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Low-Migration Printing Inks for Food Packaging

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

+357 96 030922
info@marketpublishers.com

This report profiles key players in the global Low-Migration Printing Inks for Food Packaging market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include DIC Corporation, artience Co., Ltd., SAKATA INX CORPORATION, T&K TOKA CO., LTD., Tokyo Printing Ink Mfg. Co., Ltd., Kao Corporation, FUJIFILM Holdings Corporation, Seiko Epson Corporation, Siegwerk Druckfarben AG & Co. KGaA, Flint Group, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Low-Migration Printing Inks for Food Packaging market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

Chapter Outline

Chapter 1, to describe Low-Migration Printing Inks for Food Packaging product scope, market overview, market estimation caveats and base year.

Chapter 2, to profile the top manufacturers of Low-Migration Printing Inks for Food Packaging, with price, sales quantity, revenue, and global market share of Low-Migration Printing Inks for Food Packaging from 2021 to 2026.

Chapter 3, the Low-Migration Printing Inks for Food Packaging competitive situation, sales quantity, revenue, and global market share of top manufacturers are analyzed emphatically by landscape contrast.

Chapter 4, the Low-Migration Printing Inks for Food Packaging breakdown data are shown at the regional level, to show the sales quantity, consumption value, and growth by regions, from 2021 to 2032.

Chapter 5 and 6, to segment the sales by Type and by Application, with sales market share and growth rate by Type, by Application, from 2021 to 2032.

Chapter 7, 8, 9, 10 and 11, to break the sales data at the country level, with sales quantity, consumption value, and market share for key countries in the world, from 2021 to 2026.and Low-Migration Printing Inks for Food Packaging market forecast, by regions, by Type, and by Application, with sales and revenue, from 2027 to 2032.

Chapter 12, market dynamics, drivers, restraints, trends, and Porters Five Forces analysis.

Chapter 13, the key raw materials and key suppliers, and industry chain of Low-Migration Printing Inks for Food Packaging.

Chapter 14 and 15, to describe Low-Migration Printing Inks for Food Packaging sales channel, distributors, customers, research findings and conclusion.

Contents

1 MARKET OVERVIEW

1.1 Product Overview and Scope
1.2 Market Estimation Caveats and Base Year
1.3 Market Analysis by Type
  1.3.1 Overview: Global Low-Migration Printing Inks for Food Packaging Consumption Value by Type: 2021 Versus 2025 Versus 2032
  1.3.2 Water-Based Inks
  1.3.3 Solvent-Based Inks
  1.3.4 Oil-Based Inks
  1.3.5 Reactive-Liquid Inks
  1.3.6 Other
1.4 Market Analysis by Printing Process
  1.4.1 Overview: Global Low-Migration Printing Inks for Food Packaging Consumption Value by Printing Process: 2021 Versus 2025 Versus 2032
  1.4.2 Flexographic Printing Inks
  1.4.3 Gravure Printing Inks
  1.4.4 Sheetfed Offset Printing Inks
  1.4.5 Digital Inkjet Printing Inks
  1.4.6 Liquid Electrophotographic Inks
  1.4.7 Other
1.5 Market Analysis by Application
  1.5.1 Overview: Global Low-Migration Printing Inks for Food Packaging Consumption Value by Application: 2021 Versus 2025 Versus 2032
  1.5.2 Flexible Films and Pouches
  1.5.3 Paper Bags and Wrappers
  1.5.4 Cartons and Corrugated Boxes
  1.5.5 Labels and Sleeves
  1.5.6 Metal Cans and Closures
  1.5.7 Other
1.6 Global Low-Migration Printing Inks for Food Packaging Market Size & Forecast
  1.6.1 Global Low-Migration Printing Inks for Food Packaging Consumption Value (2021 & 2025 & 2032)
  1.6.2 Global Low-Migration Printing Inks for Food Packaging Sales Quantity (2021-2032)
  1.6.3 Global Low-Migration Printing Inks for Food Packaging Average Price (2021-2032)

3 COMPETITIVE ENVIRONMENT: LOW-MIGRATION PRINTING INKS FOR FOOD PACKAGING BY MANUFACTURER

3.1 Global Low-Migration Printing Inks for Food Packaging Sales Quantity by Manufacturer (2021-2026)
3.2 Global Low-Migration Printing Inks for Food Packaging Revenue by Manufacturer (2021-2026)
3.3 Global Low-Migration Printing Inks for Food Packaging Average Price by Manufacturer (2021-2026)
3.4 Market Share Analysis (2025)
3.4.1 Producer Shipments of Low-Migration Printing Inks for Food Packaging by Manufacturer Revenue ($MM) and Market Share (%): 2025
3.4.2 Top 3 Low-Migration Printing Inks for Food Packaging Manufacturer Market Share in 2025
3.4.3 Top 6 Low-Migration Printing Inks for Food Packaging Manufacturer Market Share in 2025
3.5 Low-Migration Printing Inks for Food Packaging Market: Overall Company Footprint Analysis
3.5.1 Low-Migration Printing Inks for Food Packaging Market: Region Footprint
3.5.2 Low-Migration Printing Inks for Food Packaging Market: Company Product Type Footprint
3.5.3 Low-Migration Printing Inks for Food Packaging Market: Company Product Application Footprint
3.6 New Market Entrants and Barriers to Market Entry
3.7 Mergers, Acquisition, Agreements, and Collaborations

4 CONSUMPTION ANALYSIS BY REGION

4.1 Global Low-Migration Printing Inks for Food Packaging Market Size by Region
4.1.1 Global Low-Migration Printing Inks for Food Packaging Sales Quantity by Region (2021-2032)
4.1.2 Global Low-Migration Printing Inks for Food Packaging Consumption Value by Region (2021-2032)

+357 96 030922
info@marketpublishers.com

4.1.3 Global Low-Migration Printing Inks for Food Packaging Average Price by Region (2021-2032)
4.2 North America Low-Migration Printing Inks for Food Packaging Consumption Value (2021-2032)
4.3 Europe Low-Migration Printing Inks for Food Packaging Consumption Value (2021-2032)
4.4 Asia-Pacific Low-Migration Printing Inks for Food Packaging Consumption Value (2021-2032)
4.5 South America Low-Migration Printing Inks for Food Packaging Consumption Value (2021-2032)
4.6 Middle East & Africa Low-Migration Printing Inks for Food Packaging Consumption Value (2021-2032)

5 MARKET SEGMENT BY TYPE

5.1 Global Low-Migration Printing Inks for Food Packaging Sales Quantity by Type (2021-2032)
5.2 Global Low-Migration Printing Inks for Food Packaging Consumption Value by Type (2021-2032)
5.3 Global Low-Migration Printing Inks for Food Packaging Average Price by Type (2021-2032)

6 MARKET SEGMENT BY APPLICATION

6.1 Global Low-Migration Printing Inks for Food Packaging Sales Quantity by Application (2021-2032)
6.2 Global Low-Migration Printing Inks for Food Packaging Consumption Value by Application (2021-2032)
6.3 Global Low-Migration Printing Inks for Food Packaging Average Price by Application (2021-2032)

7 NORTH AMERICA

7.1 North America Low-Migration Printing Inks for Food Packaging Sales Quantity by Type (2021-2032)
7.2 North America Low-Migration Printing Inks for Food Packaging Sales Quantity by Application (2021-2032)
7.3 North America Low-Migration Printing Inks for Food Packaging Market Size by Country

+357 96 030922
info@marketpublishers.com

7.3.1 North America Low-Migration Printing Inks for Food Packaging Sales Quantity by Country (2021-2032)
7.3.2 North America Low-Migration Printing Inks for Food Packaging Consumption Value by Country (2021-2032)
7.3.3 United States Market Size and Forecast (2021-2032)
7.3.4 Canada Market Size and Forecast (2021-2032)
7.3.5 Mexico Market Size and Forecast (2021-2032)

8 EUROPE

8.1 Europe Low-Migration Printing Inks for Food Packaging Sales Quantity by Type (2021-2032)
8.2 Europe Low-Migration Printing Inks for Food Packaging Sales Quantity by Application (2021-2032)
8.3 Europe Low-Migration Printing Inks for Food Packaging Market Size by Country
8.3.1 Europe Low-Migration Printing Inks for Food Packaging Sales Quantity by Country (2021-2032)
8.3.2 Europe Low-Migration Printing Inks for Food Packaging Consumption Value by Country (2021-2032)
8.3.3 Germany Market Size and Forecast (2021-2032)
8.3.4 France Market Size and Forecast (2021-2032)
8.3.5 United Kingdom Market Size and Forecast (2021-2032)
8.3.6 Russia Market Size and Forecast (2021-2032)
8.3.7 Italy Market Size and Forecast (2021-2032)

9 ASIA-PACIFIC

9.1 Asia-Pacific Low-Migration Printing Inks for Food Packaging Sales Quantity by Type (2021-2032)
9.2 Asia-Pacific Low-Migration Printing Inks for Food Packaging Sales Quantity by Application (2021-2032)
9.3 Asia-Pacific Low-Migration Printing Inks for Food Packaging Market Size by Region
9.3.1 Asia-Pacific Low-Migration Printing Inks for Food Packaging Sales Quantity by Region (2021-2032)
9.3.2 Asia-Pacific Low-Migration Printing Inks for Food Packaging Consumption Value by Region (2021-2032)
9.3.3 China Market Size and Forecast (2021-2032)
9.3.4 Japan Market Size and Forecast (2021-2032)
9.3.5 South Korea Market Size and Forecast (2021-2032)

+357 96 030922
info@marketpublishers.com

9.3.6 India Market Size and Forecast (2021-2032)
9.3.7 Southeast Asia Market Size and Forecast (2021-2032)
9.3.8 Australia Market Size and Forecast (2021-2032)

10 SOUTH AMERICA

10.1 South America Low-Migration Printing Inks for Food Packaging Sales Quantity by Type (2021-2032)
10.2 South America Low-Migration Printing Inks for Food Packaging Sales Quantity by Application (2021-2032)
10.3 South America Low-Migration Printing Inks for Food Packaging Market Size by Country
10.3.1 South America Low-Migration Printing Inks for Food Packaging Sales Quantity by Country (2021-2032)
10.3.2 South America Low-Migration Printing Inks for Food Packaging Consumption Value by Country (2021-2032)
10.3.3 Brazil Market Size and Forecast (2021-2032)
10.3.4 Argentina Market Size and Forecast (2021-2032)

11 MIDDLE EAST & AFRICA

11.1 Middle East & Africa Low-Migration Printing Inks for Food Packaging Sales Quantity by Type (2021-2032)
11.2 Middle East & Africa Low-Migration Printing Inks for Food Packaging Sales Quantity by Application (2021-2032)
11.3 Middle East & Africa Low-Migration Printing Inks for Food Packaging Market Size by Country
11.3.1 Middle East & Africa Low-Migration Printing Inks for Food Packaging Sales Quantity by Country (2021-2032)
11.3.2 Middle East & Africa Low-Migration Printing Inks for Food Packaging Consumption Value by Country (2021-2032)
11.3.3 Turkey Market Size and Forecast (2021-2032)
11.3.4 Egypt Market Size and Forecast (2021-2032)
11.3.5 Saudi Arabia Market Size and Forecast (2021-2032)
11.3.6 South Africa Market Size and Forecast (2021-2032)

12 MARKET DYNAMICS

12.1 Low-Migration Printing Inks for Food Packaging Market Drivers

+357 96 030922
info@marketpublishers.com

12.2 Low-Migration Printing Inks for Food Packaging Market Restraints
12.3 Low-Migration Printing Inks for Food Packaging Trends Analysis
12.4 Porters Five Forces Analysis
12.4.1 Threat of New Entrants
12.4.2 Bargaining Power of Suppliers
12.4.3 Bargaining Power of Buyers
12.4.4 Threat of Substitutes
12.4.5 Competitive Rivalry

13 RAW MATERIAL AND INDUSTRY CHAIN

13.1 Raw Material of Low-Migration Printing Inks for Food Packaging and Key Manufacturers
13.2 Manufacturing Costs Percentage of Low-Migration Printing Inks for Food Packaging
13.3 Low-Migration Printing Inks for Food Packaging Production Process
13.4 Industry Value Chain Analysis

14 SHIPMENTS BY DISTRIBUTION CHANNEL

14.1 Sales Channel
14.1.1 Direct to End-User
14.1.2 Distributors
14.2 Low-Migration Printing Inks for Food Packaging Typical Distributors
14.3 Low-Migration Printing Inks for Food Packaging Typical Customers

15 RESEARCH FINDINGS AND CONCLUSION

16 APPENDIX

16.1 Methodology
16.2 Research Process and Data Source

I would like to order

Product name: Global Low-Migration Printing Inks for Food Packaging Market 2026 by Manufacturers, Regions, Type and Application, Forecast to 2032

Product link: https://marketpublishers.com/r/GA9A9F799D4DEN.html

Price: US$ 3,480.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page https://marketpublishers.com/r/GA9A9F799D4DEN.html
