## Abstracts

The global Low Orbit Satellite Launch Right market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The orbital resources for low-orbit satellites are limited, and Starlink has already planned for 42,000 satellites. China SatNet has urgently applied for over 12,000 satellite orbits from ITU, which are valid only until 2027. The first phase of the SatNet project plans to launch over 100 satellites, with the domestic requirement to complete launches before 2025. The first phase of the G60 constellation plans to launch over 300 satellites, to be completed within 5 years. In summary, the orbital positions for low-orbit satellites have become a limited resource for international satellite internet competition.

This report studies the global Low Orbit Satellite Launch Right demand, key companies, and key regions.
