The global Low-temperature Box Dryer market size is expected to reach \$ 1234 million by 2032, rising at a market growth of 4.6% CAGR during the forecast period (2026-2032).

Low-temperature box dryers are devices that dehydrate and dry materials at relatively low temperatures. Through hot air circulation, heat pump technology, or humidity control systems, a stable drying environment is created within a closed chamber, achieving uniform drying and reducing the impact of high temperatures on material quality. This equipment is widely used in food processing, agricultural product processing, pharmaceuticals, chemicals, and biomass material processing. Low-temperature drying is particularly suitable for temperature-sensitive materials, effectively preserving nutrients, color, and structure, while offering higher energy efficiency compared to traditional high-temperature drying methods. The upstream of the low-temperature box dryer industry chain mainly includes the supply of key components such as compressors, heat exchangers, fans, temperature control systems, stainless steel structural parts, and insulation materials. The midstream segment includes equipment design, chamber manufacturing, system assembly, and drying control system integration. Downstream applications include food processing plants, agricultural product processing enterprises, medicinal herb processing enterprises, aquatic product processing industries, and biomass processing fields, while market demand growth is driven by equipment distributors, engineering project contractors, and processing enterprises. In 2025, the global production of low-temperature box dryers was approximately 44,400 units, with a global average market price of approximately US\$19,500 per unit. The gross profit margin of major companies in the industry is approximately 28%–42%. The global production capacity of low-temperature box-type dryers is estimated to be approximately 59,100 units in 2025.

This report studies the global Low-temperature Box Dryer production, demand, key manufacturers, and key regions.
