Low-temperature dryers encompass a range of industrial drying equipment that utilize relatively cool air (typically 15°C to 35°C) compared to conventional hot-air dryers. This focus on lower temperatures offers several advantages:

Reduced Energy Consumption: By using cooler air, low-temperature dryers require less energy to achieve the desired drying effect. This is a major benefit in today's energy-conscious environment.

Improved Product Quality: The gentler drying process helps preserve the quality of heat-sensitive materials like food, pharmaceuticals, and delicate fabrics. This is crucial for maintaining product integrity and functionality.
