According to our (Global Info Research) latest study, the global Low-Voltage AC Integrated Distribution Box market size was valued at US\$ 211 million in 2025 and is forecast to a readjusted size of US\$ 286 million by 2032 with a CAGR of 3.3% during review period.

In 2025, the global production of low-voltage AC integrated distribution boxes reached 456,300 units, with an average selling price of US\$450 per unit. The global annual production capacity of low-voltage AC integrated distribution boxes is approximately 750,000 units, with a gross profit margin of approximately 23.2%. Low-voltage AC integrated distribution boxes are complete switchgear used in building, industrial, and commercial power distribution systems. They are designed for centralized, zoned, protected, controlled, and monitored low-voltage (typically AC voltage below 1000 V, commonly 400/230 V and below) power distribution networks. By integrating switches, protection, metering, control, and auxiliary equipment into one or more enclosed metal enclosures, they provide safe, reliable, and flexible power distribution solutions. The upstream of the low-voltage AC integrated distribution box industry chain includes metal enclosures and structural components, insulation and isolation materials, and measurement and communication components; the midstream consists of low-voltage AC integrated distribution box manufacturers; and the downstream is mainly used in residential and property management, commercial and office buildings.
