## **Abstracts**

According to our (Global Info Research) latest study, the global Low Voltage Power Distribution market size was valued at US\$ 28200 million in 2024 and is forecast to a readjusted size of USD 45430 million by 2031 with a CAGR of 7.1% during review period.

The role of the low voltage power distribution system in a building of any kind is to receive electrical power at one or several supply points and to deliver it to individual electrically operated devices. The importance of the power distribution system to the proper function of a building makes it highly critical, meaning the best system and its protection is vital. In the report, the information is only about the low voltage power distribution system used in Industrial Sites field, not including residential usage. And the price for one unit means all the components (including switchgear, circuit breakers, electricity meters, transformers and other components) for the whole system is provided by the same company.

Europe is the largest market with about 53% market share. Asia-Pacific and North America are follower, accounting for about 43% market share.

The key players are Schneider Electric, Siemens, Eaton, ABB, Mitsubishi Electric, Fuji Electric, Chint Group, Toshiba, Hager, Xin Long, Sen Yuan, DELIXI etc. Top 3 companies occupied about 39% market share.
