According to our (Global Info Research) latest study, the global LPO Optical Transceiver Module market size was valued at USD 157.4 million in 2023 and is forecast to a readjusted size of USD 1394.1 million by 2030 with a CAGR of 36.6% during review period.

LPO is a technology that balances and compromises. It adapts to a specific application scenario (short distance) and gives up DSP/CDR, which results in a slight loss of performance (bit error rate). However, it also reduces power consumption, cost, and latency. It has different advantages and disadvantages than CPO. Although it emerged later than CPO, it will be deployed faster than CPO.
