Abstracts

The global LPO Optical Transceiver Module market size is expected to reach \$ 1394.1 million by 2030, rising at a market growth of 36.6% CAGR during the forecast period (2024-2030).

LPO is a technology that balances and compromises. It adapts to a specific application scenario (short distance) and gives up DSP/CDR, which results in a slight loss of performance (bit error rate). However, it also reduces power consumption, cost, and latency. It has different advantages and disadvantages than CPO. Although it emerged later than CPO, it will be deployed faster than CPO.

This report studies the global LPO Optical Transceiver Module production, demand, key manufacturers, and key regions.
