Baggage conveyor system has important role in efficient operational activities at the airport. Baggage conveyor runs from baggage collection to loading and unloading from aircrafts till the baggage pickup point. Deposited bags go through bag manager for loading, reconciling, tracking, tracing, and managing baggage related operations. The rising trend of smart airport construction has induced installation of baggage conveyor that reduced the operations time and increased the efficiency, which in turn helped to generate big profit. Baggage conveyors are installed to avoid mishandling of baggage.
