Abstracts

The global Luggage Rack for Automobile market size is expected to reach \$ 5815 million by 2032, rising at a market growth of 4.4% CAGR during the forecast period (2026-2032).

Car roof racks are brackets installed on the roof of vehicles to secure large items. They are a basic component of roof-mounted systems and, in conjunction with roof boxes, roof frames, and other equipment, expand a vehicle's loading space to carry luggage, bicycles, skis, and other items. They are commonly found in SUVs and station wagons.

The upstream industry mainly includes suppliers of raw materials such as aluminum alloys and composite plastics, manufacturers of metal stamping and injection molding equipment, and companies producing fasteners and seals. The downstream industry encompasses automotive OEMs, auto parts retailers, e-commerce platforms, and end consumers, with sales and installation completed through 4S stores, modification shops, and other channels.

The global average price of car roof racks is \$165 per unit, with sales of approximately 25.32 million units and global production capacity of approximately 30,000 units. The industry profit margin is 25%.

The global automotive roof rack market is poised for diversification, lightweight materials, and segmentation in its applications. With the continued rise in outdoor sports and self-driving tourism, consumer demand for specialized extension equipment such as bicycle racks, rooftop tents, and ski racks is significantly increasing, driving product evolution from simple load-bearing devices to multi-functional integrated solutions. In terms of materials, the use of aluminum alloys and high-strength composite plastics is

becoming increasingly widespread, achieving lightweighting while maintaining load-bearing capacity, thus reducing wind resistance and fuel consumption. At the channel level, e-commerce direct sales and offline experience stores are deeply integrated, with brands using social media and outdoor communities to precisely reach consumers. The Asia-Pacific region, driven by increased car ownership and upgraded leisure consumption, is the fastest-growing market, while the European and American markets continue to upgrade towards high-end and customized products.
