Abstracts

The baby stroller that can sit and lie flat is more suitable for newborns within 6 months, because the spine and muscles are not yet well developed and can not sit steadily. The stroller that cannot lie flat is generally better to wait until the baby is more than 6 months old.

Generally speaking, a stroller can be used for babies aged 2-3 years, with a maximum load of 15kg. However, many older children still ride carts in life. Even if they weigh more than 15kg, they should pay more attention to safety when promoting.

The service life of the baby stroller is about 4-5 years. If you want to reserve it for the Second Treasure, you should pay close attention to the pregnancy preparation and take good care to ensure the safety. After all, all materials of the stroller will have aging years.
