According to our (Global Info Research) latest study, the global LVLP Pressure Feed Spray Gun market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The LVLP (Low Volume Low Pressure) pressure feed spray gun is a type of paint spray gun that is designed to use less air and less paint than traditional high volume, high pressure (HVLP) spray guns. This makes it an ideal choice for spraying smaller areas or for use in tight spaces where overspray can be a potential hazard. The pressure feed design of the LVLP spray gun is particularly useful for spraying heavy materials like primer or gel coat. It features a large, pressurized paint cup that delivers consistent and efficient paint flow to the nozzle. The LVLP pressure feed spray gun is a popular choice for automotive, marine, and woodworking applications.
