## Abstracts

The global Lychee Extract market size is expected to reach \$ 159 million by 2032, rising at a market growth of 6.9% CAGR during the forecast period (2026-2032).

Lychee Extract is a botanical extract obtained from lychee, mainly from the fruit pulp, pericarp, seed or, in some niche applications, leaf and flower of *Litchi chinensis* Sonn. It is different from Lychee Powder or Lychee Juice Powder because it usually undergoes extraction, concentration and drying, and may be supplied as a ratio extract, such as 4:1, 10:1 or 20:1, or as a standardized extract based on active markers such as polyphenols, proanthocyanidins, polysaccharides, flavonoids or vitamin C related components.

In 2025, global sales of Lychee Extract reached approximately 3,828 tons, with an average global market price of around US\$ 25/kg. Production capacity varies significantly among manufacturers, with gross profit margins ranging from approximately 30% to 60%.

This report studies the global Lychee Extract production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Lychee Extract and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
