The M-class Mitre Saw is a high-efficiency miter saw that meets occupational safety and performance standards. It is suitable for medium- and high-intensity work scenarios such as construction sites, woodworking, and decoration. It has precise angle adjustment functions, which can achieve crosscutting, bevel cutting, and compound angle cutting. It is widely used in the processing of materials such as floors, door and window frames, and decorative lines. The so-called 'M-class' mainly refers to its dust control meeting the 'M-class' requirements of the EU occupational health standards, which means that it can effectively collect dust that is moderately harmful to the human body (such as wood chips, plaster dust, fiber dust, etc.), reducing the risk of workers inhaling harmful substances. This type of equipment is usually equipped with an M-class dust suction port, compatible with industrial dust suction systems, and uses high-efficiency motors, stable slide rails, and laser guide rails, emphasizing safety, environmental protection, and high precision. The M-class miter saw is an ideal choice for professional users who are pursuing efficient cutting and a healthy working environment.
