Abstracts

According to our (Global Info Research) latest study, the global M&A Advisory Services market size was valued at US\$ 3818 million in 2025 and is forecast to a readjusted size of US\$ 6143 million by 2032 with a CAGR of 7.0% during review period.

M&A Advisory Service is a professional financial service that supports companies through mergers, acquisitions, divestitures, and strategic transactions. It covers target identification, valuation analysis, deal structuring, negotiation support, and transaction execution. Unlike pure financial consulting, M&A advisory combines strategic insight with deep industry knowledge and capital market expertise to help clients achieve growth, consolidation, or restructuring objectives. As industries face technological disruption, consolidation pressure, and globalization, M&A advisory services have become an essential tool for companies seeking scale expansion, portfolio optimization, and long-term value creation. The average gross margin in this industry reached 79.26%.

In the upstream supply chain, M&A advisory relies on financial data platforms, valuation models, legal and accounting frameworks, and regulatory intelligence. Key upstream suppliers include Bloomberg for market and transaction data, Refinitiv for deal databases and analytics, and International Financial Reporting Standards for financial reporting consistency. These inputs underpin accurate valuation and risk assessment. Midstream advisory firms focus on strategy formulation, due diligence coordination, financial modeling, and negotiation execution. Downstream, M&A advisory services are used by corporate clients and financial sponsors such as Siemens, Alibaba Group, and Blackstone, supporting strategic acquisitions, divestments, and investment transactions. Continued industry consolidation and capital reallocation drive sustained demand for

M&A advisory services.
