Abstracts

Machinable ceramic has a continuous use temperature of 800°C and a peak temperature of 1000°C. Its coefficient of thermal expansion readily matches most metals and sealing glasses. It is non-wetting, exhibits zero porosity, and unlike ductile materials, won't deform. It is an excellent insulator at high voltages, various frequencies and high temperatures. And, when properly baked out, it won't outgas in vacuum environments.

Scope of the Report:

This report focuses on the Machinable Ceramic in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Machinable ceramics allow ceramic components to be made without the delay or expense of conventional ceramic manufacturing processes.

Applications of machinable ceramic include Aerospace Industry, Constant & Ultra-high Vacuum Environments, Medical Industry, Welding Nozzles, Semi-conductor Industry and so on. Among those applications, Semi-conductor industry accounts for the largest market share, which was about 32.24% in 2016.

The machinable ceramic industry is relatively concentrated. Tokuyama is the largest producer with an output of 72389 Kg in 2016. The second producer, Corning, comes from France, with 28.08% output share.

Global production of machinable ceramic increased from 232517 Kg in 2012 to 238512

Kg in 2016. There is no doubt that Japan is the largest production base. As for consumption, USA is the largest consumer with about 27.12% share in 2016. Europe is the follower, consuming about 53727 Kg.

Due to its own advantages, machinable ceramic industry keeps upward tendency in the recent years, it is estimated that global machinable ceramic industry will be worthy of 152.83 million USD in 2022.

The worldwide market for Machinable Ceramic is expected to grow at a CAGR of roughly 3.6% over the next five years, will reach 160 million US\$ in 2023, from 130 million US\$ in 2017, according to a new GIR (Global Info Research) study.
