Abstracts

The global Machine Foreign Language Translation Systems market size is expected to reach $ 1089 million by 2029, rising at a market growth of 11.7% CAGR during the forecast period (2023-2029).

The globalization of businesses, linguistic diversity, and growing requirements for easy communication are driving market growth.

Globalization has significantly facilitated meeting the needs of linguistically diverse local audiences. Growing importance of businesses in emerging markets, creation of online content, and need for enabling global collaboration among employees is expected to drive market growth over the forecast period.

Machine foreign language translation systems is a sub-field of computational linguistics, and can translate source content into target languages by using machine-learning technologies from and to any of their supported languages.Machine foreign language translation systems works with large amounts of source and target languages, which are compared and matched with each other by a machine translation engine. There are mainly three types of machine translation methods: Rules-based machine translation, Statistical machine translation, Neural machine translation. Machine translation can work without human intervention to translate considerable amounts of information that cannot be translated conventionally. The apparent benefits of machine translation as following: saves time, reduces costs, and memorizes terms. Humans may use MT to help them render text and speech into another language, or the MT software may operate without human intervention.

This report studies the global Machine Foreign Language Translation Systems demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Machine Foreign Language Translation Systems, and provides market size (US$ million) and Year-over-Year (YoY) growth, considering 2022 as the base year. This report explores demand trends and competition, as well as details the characteristics of Machine Foreign Language Translation Systems that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Machine Foreign Language Translation Systems total market, 2018-2029, (USD Million)

Global Machine Foreign Language Translation Systems total market by region & country, CAGR, 2018-2029, (USD Million)

U.S. VS China: Machine Foreign Language Translation Systems total market, key domestic companies and share, (USD Million)

Global Machine Foreign Language Translation Systems revenue by player and market share 2018-2023, (USD Million)

Global Machine Foreign Language Translation Systems total market by Type, CAGR, 2018-2029, (USD Million)

Global Machine Foreign Language Translation Systems total market by Application, CAGR, 2018-2029, (USD Million)

This reports profiles major players in the global Machine Foreign Language Translation Systems market based on the following parameters – company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Google, RWS, Microsoft, Lionbridge, AWS, IBM, Omniscien Technologies, Baidu and Tencent Cloud TMT, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals, COVID-19 and Russia-Ukraine War Influence.
