In the context of machine vision, the objective lens is an essential component of a camera system that plays a crucial role in capturing images or video of a scene. The objective lens is responsible for gathering and focusing light from the scene onto the camera's image sensor, which can be a CCD (Charge-Coupled Device) or a CMOS (Complementary Metal-Oxide-Semiconductor) sensor.

With the increasing demand for higher image quality and precision in machine vision applications, there was a growing trend towards high-resolution objective lenses. These lenses were designed to capture detailed images, which is especially crucial in tasks like quality control, inspection, and measurement.
