According to our (Global Info Research) latest study, the global Magnesium Alloys for Aerospace Structure market size was valued at US\$ 186 million in 2025 and is forecast to a readjusted size of US\$ 305 million by 2032 with a CAGR of 7.2% during review period.

Magnesium alloys for aerospace structures refer to magnesium-based alloy materials specifically designed for use in aircraft, spacecraft, and related structural components. They possess lightweight properties, high specific strength, good corrosion resistance, and machinability, meeting the strength and weight optimization requirements of aircraft fuselages, wings, cockpit frames, and satellite and spacecraft structures. Their composition is typically modified by adding elements such as aluminum, zinc, and manganese to improve mechanical properties, thermal stability, and creep resistance, making them key metallic materials for achieving lightweight design and performance optimization in the aerospace field.

The magnesium alloy industry chain for aerospace structures mainly includes upstream raw material supply, alloy smelting and casting, midstream processing and manufacturing, and downstream applications. Upstream supply includes high-purity magnesium ingots, alloying elements such as aluminum, zinc, and manganese, and alloying auxiliary materials; midstream production of aerospace magnesium alloy bars, plates, and profiles through processes such as smelting, casting, extrusion, or rolling, followed by precision machining and surface treatment; downstream applications include the manufacture of aircraft fuselages, wings, cockpit frames, and spacecraft structural components, extending to aircraft maintenance, parts replacement, and lightweight aircraft design services, forming a complete industry chain ecosystem from

raw materials to end-use aerospace structures.

In 2025, the average price of magnesium alloys for aerospace structures will be US\$3,000 per ton, with sales volume of 60,330 tons, total production capacity of 75,500 tons, and a gross profit margin of approximately 39%.
