Abstracts

The global Magnesium Chloride Hexahydrate Flakes market size is expected to reach \$ 237 million by 2032, rising at a market growth of 1.9% CAGR during the forecast period (2026-2032).

Magnesium chloride hexahydrate is Small white flakes with formula ($MgCl_2 \cdot 6H_2O$), which has the property of colorless and easy deliquescence. It has been widely used in metallurgy, chemical industry, building materials, food and transportation industry. This report studies the magnesium chloride hexahydrate flakes market. In 2024, global Magnesium Chloride Hexahydrate Flakes production reached approximately 2223 K MT, with an average global market price of around US\$ 88 per MT.

The magnesium chloride hexahydrate flakes market is driven by their broad applications across de-icing, dust control, construction, water treatment, and industrial processing. The compound's hygroscopic nature makes it effective in binding dust on unpaved roads and providing reliable performance in low-temperature de-icing, particularly in colder regions. In construction, it is used as an additive in cement and as a setting accelerator, while in agriculture it finds roles in soil conditioning and as a source of magnesium for crops. Growing infrastructure development, expansion of road maintenance programs, and rising awareness of cost-effective dust suppression solutions are key factors fueling demand.

On the other hand, market growth is moderated by factors such as availability of substitutes like calcium chloride and sodium chloride, as well as logistical costs associated with transporting bulk mineral salts. Environmental considerations related to chloride runoff are also prompting regulatory scrutiny in some regions, which could impact long-term usage in de-icing. Nevertheless, increasing demand from emerging

economies for construction materials and industrial applications, alongside innovations in eco-friendlier formulations, is expected to create new opportunities. The combination of infrastructure growth, industrial demand, and regional climate-driven needs positions magnesium chloride hexahydrate flakes as a steadily growing segment within the specialty salts industry.

This report studies the global Magnesium Chloride Hexahydrate Flakes production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Magnesium Chloride Hexahydrate Flakes and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
