## Abstracts

The global Magnesium Citrate market size is expected to reach \$ 64.33 million by 2032, rising at a market growth of 4.2% CAGR during the forecast period (2026-2032).

Magnesium citrate is a chemical compound composed of magnesium and citric acid. It is a highly soluble and bioavailable form of magnesium, commonly used as a dietary supplement and pharmaceutical ingredient. Magnesium is an essential mineral involved in numerous biochemical reactions in the body, including muscle and nerve function, blood glucose control, and bone development. Citric acid enhances the solubility and absorption of magnesium, making magnesium citrate an effective supplement for addressing magnesium deficiencies.

Typically available in powder, capsule, tablet, or liquid form, magnesium citrate is widely used for its health benefits. It is commonly employed as a laxative to relieve occasional constipation due to its ability to increase water in the intestines. Additionally, it is recommended for supporting cardiovascular health, maintaining bone density, and improving muscle relaxation.

The product is also used in various industries beyond healthcare, including food and beverage manufacturing as a food additive, where it acts as an acidity regulator or fortification agent. Its versatility, safety profile, and efficacy have made magnesium citrate a popular choice in both consumer health products and industrial applications.

Magnesium citrate is widely used in over-the-counter (OTC) products for its laxative properties. It is also included in multivitamins and magnesium supplements aimed at correcting deficiencies and supporting overall health.

It is used as a food additive to regulate acidity and as a mineral fortifier in functional foods and beverages, such as fortified juices, nutritional shakes, and sports drinks.

Magnesium citrate is occasionally used in personal care products for its mild exfoliating and pH-regulating properties.

In agriculture, magnesium citrate may be included in fertilizers or animal feed supplements to provide magnesium, a crucial nutrient for plants and livestock.

Currently, there are many suppliers all over the world, such as Jungbunzlauer, Global Calcium, Gadot Biochemical Industries, Sucroal, Dr. Paul Lohmann, Penglai Marine, Dongtai Food Ingredients, Xiyang Chemical and Hengheng Fine Chemical etc. Market concentration in this industry is high, and total sales share of those 10 suppliers is 92%.
