Abstracts

The global Magnesium Glycerophosphate market size is expected to reach \$ 394 million by 2032, rising at a market growth of 4.4% CAGR during the forecast period (2026-2032).

Magnesium glycerophosphate is an organophosphate compound formed from glycerophosphate and magnesium ions, belonging to the organic mineral salt nutritional fortifier category. Its chemical formula is $C_3H_7MgO_4P$ (CAS: 927-20-8). It is usually a white powder with good bioavailability and low gastrointestinal irritation. This product combines magnesium supplementation and phosphate metabolism functions, and is widely used in dietary supplements, pharmaceutical excipients, and functional foods, especially suitable for formulation systems requiring gentle magnesium supplementation or long-term nutritional intervention. In 2025, the global market volume of magnesium glycerophosphate was approximately 4,239 tons, with an average price of USD 67,000 per ton and a gross profit margin ranging from 25% to 50%. The industry chain of Magnesium Glycerophosphate consists of upstream raw materials, midstream manufacturing, and downstream applications. Upstream includes magnesium sources (such as magnesium oxide or hydroxide), glycerophosphate, and phosphoric acid, with relatively stable supply but influenced by mining and phosphate chemical markets. The midstream involves synthesis, purification, crystallization, and drying processes. High standards such as GMP compliance are required, especially for pharmaceutical-grade products. Technical barriers lie in purity control, bioavailability optimization, and product stability. Downstream applications are mainly in pharmaceuticals and dietary supplements, including magnesium deficiency treatment, cardiovascular support, bone health, and neurological regulation. Functional foods and sports nutrition are emerging growth areas. Distribution channels include pharmaceutical companies, nutraceutical brands, e-commerce, and hospitals.

This report studies the global Magnesium Glycerophosphate production, demand, key manufacturers, and key regions.
