According to our (Global Info Research) latest study, the global Magnet Extensometers market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Magnetic Extensometer System comprises a probe, a graduated tape on a reel and an access pipe along which magnetic targets are positioned. A datum or reference magnet is fixed to the bottom pipe. The probe design incorporates triple reed switches. As the probe moves along the access pipe, it detects the magnets by way of a reed-switch circuit closing. This causes a light to display and a buzzer to sound at the reel.
