The global Magnetic Display market size is expected to reach \$ 1909 million by 2032, rising at a market growth of 14.8% CAGR during the forecast period (2026-2032).

A magnetic display is a display device that can be quickly installed and fixed through built-in magnets. Its display module or back panel has strong magnets and can be directly adsorbed on magnetic surfaces such as metal frames and walls. It does not require complicated screw fixation or bracket installation. It has the characteristics of easy installation, flexible disassembly, and rapid splicing. It is suitable for scenes that require frequent layout adjustments or rapid construction, such as exhibitions, stage backgrounds, commercial advertisements, etc. At the same time, it can achieve seamless splicing to adapt to display needs of different sizes and shapes, and is both practical and flexible.
