Magnetic drive mixers are innovative mixing systems that utilize magnetic coupling to transfer torque from an external drive to an impeller within a mixing vessel. Starting with the design, magnetic drive mixers feature a hermetically sealed construction that prevents leaks and contamination, making them ideal for handling hazardous or sensitive fluids. In terms of operation, these mixers use a magnetic field to drive the impeller, eliminating the need for traditional shaft seals, which are prone to leakage. Transitioning to the components, a magnetic drive mixer comprises an outer drive magnet connected to the motor and an inner driven magnet attached to the impeller.
