## Abstracts

The global Magnetic Suction Power Bank market size is expected to reach \$ 3967 million by 2032, rising at a market growth of 7.1% CAGR during the forecast period (2026-2032).

In 2025, global Magnetic Suction Power Bank production reached approximately 105,915.2 K units, with an average global market price of around 22.4 USD/unit.

Magnetic Suction Power Bank is a portable energy storage device integrating magnetic positioning and wireless charging technology, designed to solve the inconvenience of traditional wired charging and misalignment issues of ordinary wireless charging. It embeds a neodymium magnet array inside to achieve precise and stable adsorption with terminal devices, and relies on electromagnetic induction principles to transmit electrical energy through oscillating magnetic fields between internal transmitting coils and device receiving coils. Most products support dual charging modes of magnetic wireless charging and wired fast charging, with built-in intelligent protection mechanisms such as over-temperature, over-voltage and foreign object detection, featuring the characteristics of convenient operation, stable connection, high positioning accuracy and multi-scenario adaptability.

Driven by the popularization of magnetic charging ecosystems led by mainstream consumer electronics brands and the growing demand for convenient mobile power supply in daily and outdoor scenarios, the market demand for magnetic suction power banks continues to rise, with rigid demand from office workers, outdoor enthusiasts and commuters, and incremental demand from the expanding market of wearable devices. The trend of product integration and intelligence further promotes industry upgrading. Business opportunities lie in the R&D of thin and lightweight products with high charging

efficiency, breaking brand compatibility barriers through intelligent protocol chips, integrating heat dissipation technologies and safety protection systems to enhance product reliability, developing multi-device simultaneous charging solutions, and seizing the market dividend brought by the upgrading of consumer demand for charging experience.
