According to our (Global Info Research) latest study, the global Magnetic Vibration Therapy Apparatus market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Magnetic Vibration Therapy Apparatus is composed of a host and a magnetic force line guide, and uses a synchronous physical therapy device that combines three physical factors: alternating magnetic field, biomagnetic vibration, and heat. After the warm conduction coil is connected to the alternating current, on the one hand, it generates an alternating magnetic field, which produces a unique non-mechanical vibration due to the continuous change of the direction of the magnetic field; The three physical therapy factors required by the instrument therapy can reduce swelling, analgesia and anti-inflammation, and relieve fatigue and muscle soreness.
