Abstracts

The global Magnetic Vibration Therapy Apparatus market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Magnetic Vibration Therapy Apparatus is composed of a host and a magnetic force line guide, and uses a synchronous physical therapy device that combines three physical factors: alternating magnetic field, biomagnetic vibration, and heat. After the warm conduction coil is connected to the alternating current, on the one hand, it generates an alternating magnetic field, which produces a unique non-mechanical vibration due to the continuous change of the direction of the magnetic field; The three physical therapy factors required by the instrument therapy can reduce swelling, analgesia and anti-inflammation, and relieve fatigue and muscle soreness.

This report studies the global Magnetic Vibration Therapy Apparatus production, demand, key manufacturers, and key regions.
