## Abstracts

Mahjong is a traditional Chinese tile-based game that originated in China during the Qing dynasty. It is commonly played by four players and involves skill, strategy, and a degree of chance. The game is usually played with a set of 144 tiles based on Chinese characters and symbols, although there are regional variations in the tile sets used.

The objective of Mahjong is to build a winning hand by drawing and discarding tiles in turns, similar to the card game Rummy. Players take turns drawing tiles from a wall of face-down tiles and then discard a tile to maintain a hand of 13 tiles. The goal is to form specific combinations of tiles, known as 'melds' or 'sets,' which can include three-of-a-kind, four-of-a-kind, or sequences of consecutive tiles in the same suit.

According to our (Global Info Research) latest study, the global Mahjong market size was valued at US\$ million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of %during review period.
