Mainline and lateral inspection trucks are specialized mobile units used for the inspection and maintenance of pipeline systems. These trucks are equipped with advanced cameras, sensors, and other inspection technologies, allowing for comprehensive checks of both mainline and lateral pipelines. They provide real-time data transmission to help identify issues such as cracks, corrosion, blockages, and other pipeline defects. Widely used in urban water supply, natural gas, power, and oil pipeline systems, these inspection trucks are essential tools for pipeline maintenance and monitoring.
