According to our (Global Info Research) latest study, the global Managed Data Lake Service market size was valued at US\$ 12390 million in 2025 and is forecast to a readjusted size of US\$ 49687 million by 2032 with a CAGR of 21.9% during review period.

Managed Data Lake Service is a fully outsourced, end-to-end cloud or on-premise professional service suite that delivers a standardized, operation-free data lake foundation for enterprises, with all underlying infrastructure, data pipeline, metadata catalog, governance, compute optimization, security, monitoring and lifecycle maintenance undertaken by professional vendors or cloud providers.

A self-built (unmanaged) data lake requires internal teams to maintain storage clusters, ETL pipelines, metadata, access control, small-file compaction and backup; managed services abstract all repetitive heavy O&M work, enabling data teams to focus only on analytics, BI and AI modeling.
