The global Managed File Transfer (MFT) Software market size is expected to reach \$ 4514 million by 2032, rising at a market growth of 10.0% CAGR during the forecast period (2026-2032).

Managed file transfer (MFT) is a type of software used to provide secure internal, external and ad-hoc data transfers through a network. MFT products are built using the FTP network protocol. However, because federal regulations require that MFT products meet strict regulatory compliance standards, they include mechanisms to ensure a higher level of security and help keep information private.

Global key players of Managed File Transfer (MFT) Software include IBM, Oracle Corporation, Wipro Limited, Broadcom (CA Technologies), Fortra, etc. The top five players hold a share about 46%. North America is the largest market, and has a share about 39%, followed by Europe and Asia Pacific with share 30% and 25%, separately. In terms of product type, System-centric File Transfer is the largest segment, occupied for a share of 86%. In terms of application, BFSI has a share about 24 percent.
