Abstracts

The global Managed File Transfer Software market size is expected to reach \$ 2226 million by 2032, rising at a market growth of 5.6% CAGR during the forecast period (2026-2032).

Managed file transfer (MFT) is a type of software used to provide secure internal, external and ad-hoc data transfers through a network. MFT products are built using the FTP network protocol. However, because federal regulations require that MFT products meet strict regulatory compliance standards, they include mechanisms to ensure a higher level of security and help keep information private.

The major players in global Managed File Transfer Software market include IBM, Axway, Saison Information Systems, etc. North America is the main market, and occupies about 45% of the global market. System-centric File Transfer is the main type, with a share about 80%. BFSI is the main application, which holds a share about 20%.
